

ADD-LO

Game Board

Score Board

Round	Player A	Player B

ADD-LO

Objective: Addition integers

Materials: Game board
 2 dice – 1 red, 1 white
 Scoreboard

- The object of the game is to cover as many of the circles as possible and have the lowest score at the end of the game.
- Each player has a game board and score board.
- Players take turns rolling the 2 dice
- White dice represent positive numbers
- Red dice represent negative number
- As the dice are rolled a player has several choices
 - Cover two circles with the values both dice
 - Cover one circle with the sum of both dice
 - Cover two circles with the same sum as the sum rolled
 - On the last turn, may cover a circle with the value of one die
- If a player can not cover any circles or is only able to cover the value of one die, their game has ended
- The circles that remain uncovered are used for scoring
- The score is the sum of the absolute value of each uncovered circle.
